

ProjectNo	Title	ISBN	Year
HG00051	Application for funding for the Australian Rural Leadership Program - Course 8	0 7341 0664 5	2003
VG00001	Reducing pesticide residue screening costs for the Australian vegetable industry through the development of multi-pesticide residue screening protocols	0 7341 0702 1	2003
VG00016	How to demonstrate good environmental performance: a practical mechanism for vegetable growers	0 7341 0690 4	2003
VG00025	Monitoring of tospoviruses by real time polymerase chain reaction	0 7341 0586 X	2003
VG00037	Development of an internationally competitive eastern Australian cauliflower industry	0 7341 0383 2	2001
VG00044	Total crop management of clubroot in brassica vegetables	0 7341 0715 3	2003
VG00074	Attendance at the 28th International Carrot Conference in Pasco, Washington USA, August 2000	0 7341 0295 X	2001
VG00077	The development of best practice handling systems for hand picked beans	0 7341 0442 1	2002
VG00085	Western flower thrips management strategy - Information delivery pilot project	0 7341 0773 0	2002
VG00088	National Asian Foods newsletter: Production & distribution	Published by RIRDC	2003
VG00089	Investigative tour of reclaimed water use for horticulture in Israel and California, April 2001	0 7341 0408 1	2002
VG00091	Super sweet corn cropping feasibility study for processing	0 7341 0550 9	2002
VG00094	Developing strategic alliances and partnerships between Australian and New Zealand vegetable industries, July 2001	0 7341 0358 1	2002
VG00098	Assessment of developments in the Hong Kong and Chinese markets for fresh and processed vegetables	0 7341 0345 X	2001
VG002	Advanced breeding of zucchini	1 86423 046 0	1992
VG006	Effect of soil conditions & fertilisers on cadmium in vegetables - a national approach	1 86423 436 9	1995
VG007	Investigation of the effects of planting density and nutrition on marketable yield of capsicums	1 86423 397 4	1993
VG01017	Extension of an integrated management strategy for celery mosaic virus in celery crops in Western Australia	0 7341 0596 7	2002
VG01018	Biennial meeting of the national vegetable pathology working group, 2002	0 7341 0529 0	2002
VG01049	Strategies for the safe use of poultry litter in food crop production	0 7341 0750 1	2003
VG01090	Export opportunity evaluation study for the Australian vegetable industry	0 7341 0519 3	2002
VG015	The development of technology to adapt & maximise the drip irrigation system	1 86423 450 4	1996
VG019	Herbicide strategies for controlling key weeds of fresh and processing vegetables	1 86423 445 8	1994
VG020	Pest management in North Queensland vegetables	1 86423 981 6	1999
VG02003	A better packaging system for celery	0 7341 0723 4	2003
VG021	Insecticide resistance and management strategies for three vegetable pests in South East Queensland	1 86423 428 8	1996
VG022	Irrigation scheduling for shallow rooted vegetables	1 86423 592 6	1994
VG024	Bean root rot - etiology and control	1 86423 494 6	1994
VG025	Commercialisation of eda-mame (vegetable soybean) in Queensland		1995

VG029	Development of methods for the rapid detection & elimination of virus diseases of garlic	1 86423 404 0	1995
VG033	Reduced pesticide use on lettuce	1 86423 154 8	1992
VG034	Implementation of an IPM pilot program for the fruit & vegetable industries in the Bundaberg district	1 86423 356 7	1993
VG036	Carrot yield decline	1 86423 307 9	1996
VG039	Vegetable production & water pollution on the Western Australian coastal plain	1 86423 638 8	1994
VG046	Reduced pesticide use on tomatoes and capsicums	1 86423 323 0	1996
VG105	Management of seedling establishment problems in processing vegetable crops	1 86423 322 2	1995
VG106	An evaluation of egg parasites for the management of heliothis	1 86423 424 5	1994
VG111	Beetroot genetic improvement	1 86423 553 5	1995
VG114	Management of fungicide resistance in horticulture crops	1 86423 050 9	1993
VG119	Buttercup squash (kabocha) as a potential export crop to Japan	1 86423 492 X	1993
VG126	Improvement of yield potential in commercial fennel crops through improved fruit set	1 86423 352 4	1995
VG130	Development of green soybean vegetable for domestic and Japanese markets	1 86423 585 3	1994
VG131	Development of a large scale pilot production facility for the parasitoid Trichogramma species	1 86423 153 X	1995
VG144	Extension and irrigation guidelines for poppies in southern Tasmania	See Jrnl Ag Sci 108	1992
VG145	Genetic improvement in green beans	1 86423 487 3	1994
VG146	Management strategies for Rhizoctonia disease of processing beetroot	1 86423 485 7	1993
VG148	Shipping & static trials of cauliflower containers using modified atmosphere packaging	1 86423 255 2	1993
VG201	Introduction of integrated pest management programs for fruit & vegetable crops in Bowen	1 86423 423 7	1996
VG204	Control of black rot contamination in brassica seeds	1 86423 151 3	1995
VG205	Improving quality and efficiency of retail handling of fruit and vegetables	0 7306 4747 1	1994
VG206	Integrated pest management - phase II	none	1994
VG207	Development & calibration of plant tests for nitrogen & potassium for Brussels sprouts for nutrient management in Australia	1 86423 308 7	1996
VG210	The development of processing sweetcorn and bamboo industries in Queensland	1 86423 372 9	1995
VG211	Assessment of fruit & vegetable industry situation and adoption of new technologies in South Queensland	1 86423 495 4	1995
VG213	Sustainable cropping systems in brassicas	1 86423 297 8	1996
VG214	Integrated pest management on beans	0 7341 0297 6	2001
VG215	Improved management of pumpkin nutrition in North Queensland	1 86423 347 8	1996
VG221	Export cauliflower improvement	1 86423 362 1	1995
VG224	Packaging of pre-prepared vegetables	1 86423 658 2	1995
VG226	Control of lettuce downy mildew	1 86423 150 5	1994
VG227	Improving international competitiveness of the processing sweetcorn industry in the Central West NSW	1 86423 306 0	1995
VG303	Improved profitability in bean, beetroot and sweetcorn production	1 86423 661 2	1997
VG304	Investigation of new vegetable production systems in the USA	1 86423 410 5	1995

VG306	Integrated management of clubroot of brassicas - Survey and pilot studies	1 86423 324 9	1995
VG307	Control of Amaranthus species in green bean and summer brassica crops in Tasmania	1 86423 414 8	1996
VG311	Development of sustainable intensive crop production systems	1 86423 612 4	1996
VG312	Eda-mame (vegetable soybean) development for the frozen export market	1 86423 318 4	1995
VG313	Intensive vegetable production and vesicular arbuscular mycorrhizas	1 86423 411 3	1996
VG314	Strategic application of non-persistent chemical for control of heliothis in processing peas	1 86423 313 3	1996
VG315	Importance of feathery mottle virus in sweet potatoes in Queensland	1 86423 462 8	1997
VG316	Etch resistance development in butternut pumpkin	1 86423 702 3	1997
VG317	Integrated management of bacterial head rots of broccoli	1 86423 798 8	1998
VG319	Sweetcorn breeding and development to meet the requirements of Australian and export markets	1 86423 697 3	1997
VG323	Fruit fly disinfestation of cucurbits and capsicums with insecticides for New Zealand	1 86423 624 8	1995
VG324	Microbial products for biological control of root-knot nematodes	1 86423 422 9	1996
VG327	Cause and control of new lettuce diseases	1 86423 660 4	1997
VG334	Improving export performance of vegetables from Tasmania	1 86423 605 1	1996
VG339	Investigations of vectors and alternate hosts of tomato spotted wilt virus in lettuce crops	1 86423 413 X	1994
VG401	Development of a disease indexing package to predict crop losses in peas and beetroot	1 86423 815 1	1998
VG404	Total heavy metal status of horticultural soils in Queensland	1 86423 659 0	1997
VG405	An IPM package for heliothis in vegetables	1 86423 726 0	1997
VG406	Integrated weed management in vegetable production	1 86423 758 9	1998
VG407	Improved irrigation management in potatoes and onions	1 86423 608 6	1997
VG408	Quantitative evaluation of the systems used to meet New Zealand import requirements for cucurbit crops	1 86423 792 9	1997
VG412	Strategic use of pesticides as part of IPM programs for vegetables	0 7341 0089 2	1998
VG414	Evaluation of temperate vegetable cultivars for fresh export	1 86423 379 6	1995
VG415	Pests and disease of tomato and cucurbits - Identification posters	Ag WA	1996
VG416	Development of the pickled vegetable industry in the Riverina	1 86423 298 6	1996
VG418	An investigation of ascochyta and related diseases in processing peas	0 7341 0079 5	1998
VG419	An investigation into improved methods of weed control in kabocho & pumpkins	1 86423 692 2	1997
VG424	Integrated pest management in vegetable crops grown in the dry tropics of North Queensland	0 7341 0108 2	2000
VG431	Integrated strategies to control and prevent the spread of clubroot	1 86423 699 X	1998
VG433	Production of vegetable green soybean for domestic market and trial shipments to Japan	1 86423 268 4	1996
VG436	Development of the fresh sweetcorn industry to meet the requirements of Australian and export market	0 7341 0049 3	2000

VG442	Trial training program for Granite Belt vegetable growers on pest and beneficials	1 86423 630 2	1997
VG503	Training program for growers on pests and beneficials in vegetable crops	1 86423 904 2	1998
VG511	Molecular identification of strains of Sclerotinia species	1 86423 707 4	1998
VG519	The use of red mud/gypsum to reduce water pollution from sandy soils used for vegetable production	1 86423 756 2	1998
VG540	Towards 2000 Herb Industry Conference & Expo, Bairnsdale, July 1996	1 86423 570 5	1997
VG602	Benchmarking the quality of krasnozems under horticulture	1 86423 902 6	1998
VG620	Visit by Professor Merritt Nelson, University of Arizona to consult on the use of GIS and related technologies to pest and disease problems in crops	0 7306 6766 9	1997
VG812	Cauliflower selection for export, frozen processing and fresh market production in South Australia	1 86423 514 4	1996
VG818	The control of volunteer potato plants in subsequent vegetable and poppy crops		1996
VG94043	Export cauliflower quality improvement (cont'd VG443)	0 6463 7704 3	1999
VG95010	Carrot export development (cont'd VG510)	0 7341 0053 1	2000
VG95027	Control of amaranthus and other weeds in beans	1 86423 943 3	1999
VG95036	Phenological development and quality of broccoli in south-east Queensland (cont'd VG536)	0 7341 0121 X	2000
VG96006	Breeding for sweetness and tenderness in tropical and subtropical sweetcorn (cont'd VG606)	0 7341 0433 2	2002
VG96008	Eggfruit caterpillar - pheromone development and control methods (cont'd VG608)	0 7341 0342 5	2000
VG96010	Pumpkin varietal improvement (incorp VG610 & VG517)	0 7341 0109 0	2000
VG96015	An investigation of carrot diseases in north-western Tasmania and their control (cont'd VG615)	0 7341 0192 9	2001
VG96030	DNA finger printing technology for purity analysis of hybrid seed in Brassica crops	0 7341 0298 4	2001
VG96033	Management of soil-borne pathogens in vegetable cropping systems at Bundaberg, Queensland (cont'd VG633)	0 7341 0062 0	2000
VG97011	Remote sensing as an aid to horticultural crop recording and husbandry	0 7341 0301 8	2001
VG97012	Assessing large seeded broad beans for the Japanese market	0 7341 0489 8	2002
VG97014	Advancing the integrated management of diamondback moth in Brassica vegetables	0 7341 0296 8	2001
VG97016	Vegetable cool chain management	0 7341 0465 0	2002
VG97019	Factors influencing carrot size and shape	0 7341 0181 3	2001
VG97020	Developing sustainable vegetable production systems - preliminary project	0 7313 1557 X	1998
VG97021	Investigation of plastic mulch alternatives for intensive vegetable production	0 7341 0232 1	2001
VG97022	Developing vegetable quality management training	0 7341 0035 3	2000
VG97023	Sweet potato variety improvement	0 7341 0159 7	2000
VG97028	Economic sustainability of vegetable farms	0 7341 0184 8	2001

VG97034	Study tour to Malaysia, Singapore, Taiwan, Korea and Japan to identify export opportunities and germplasm availability for vegetables, October 1997	0 7341 0111 2	1999
VG97040	Developing Trichogramma wasps for use in integrated pest management programs of brassica and sweet corn	0 7341 0137 6	2000
VG97042	Developing new export vegetables with emphasis on burdock, daikon and globe artichoke	0 7341 0712 9	2003
VG97044	Improving the safety of minimally processed vegetables by implementing rapid testing for Listeria	1 86423 906 9	1998
VG97045	New washing treatments for minimally processed vegetables	0 7341 0306 9	2001
VG97050	Biofumigation - bioactive Brassica rotations for IPM of soil borne pests and diseases	0 7341 0130 9	2000
VG97051	Ascochyta rot on peas and its control	0 7341 0160 0	2000
VG97054	Resistance of Brussels sprouts to root knot nematodes	1 86423 937 9	1998
VG97056	Optimising fresh bean quality through the production, distribution and marketing chain (as a model for other vegetable products)	1 86423 938 7	1999
VG97060	Weed management in peas	0 7341 0305 0	2001
VG97062	Weed management in sweetcorn	0 7341 0156 2	2000
VG97063	Weed management in pumpkins and other cucurbit crops	0 7341 0157 0	2000
VG97064	Assessment of tomato, capsicum and eggplant cultivars and production techniques for export to Japan and Taiwan and demonstration of IPM of Botrytis rot for local and export crops	0 7341 0214 3	2001
VG97066	National workshop on the registration of pesticides for use on vegetables and other minor crops	1 86423 903 4	1999
VG97073	Integrated weed management, cover crop, mulch and rotation management in vegetable production systems	0 7341 0143 0	2000
VG97076	National clubroot management strategies for production of quality export and domestic Brassicas	0 7341 0138 4	2000
VG97083	Improving lettuce quality through adoption of sustainable production practices	0 7341 0171 6	2000
VG97084	Integrated management of Sclerotinia disease in beans	0 7341 0230 5	2000
VG97103	Management of celery mosaic virus	0 7341 0357 3	2001
VG97104	Investigation and development of selected Asian markets for fresh and processed vegetables from the Cowra Vegetables To Asia Group	1 86423 850 X	1998
VG97111	Vegetable market research audit and development of a market research plan, 1998	1 86423 817 8	1998
VG98002	Development of strategies to control sweet potato weevil	0 7341 0498 7	2002
VG98004	Investigation of capsicum genetic resistance to tomato spotted wilt virus, tospovirus serotype IV and bacterial spot disease	0 7341 0228 3	2001
VG98006	Developing an IPM strategy to reduce tomato spotted wilt virus in the dry tropics	0 7341 0525 8	2002
VG98007	Export of frozen low chemical and organic vegetables to East Asia and the European Union	0 7341 0102 3	2000
VG98011	Integrated management of Pythium diseases of carrots	0 7341 0333 6	2001

VG98013	Best practices for irrigation and fertiliser management on sandy soils	0 7341 0665 3	2003
VG98014	An industry driven process to promote the expansion of a competitive Australian export cauliflower industry	0 7341 0706 4	2003
VG98033	Young Vegetable Growers Group - pilot study	0 7341 0076 0	2000
VG98046	Developing sustainable vegetable production systems	0 7341 0237 1	2001
VG98048	Adapting to change: enhancing change skills through collaboratively developing an integrated pest & disease management strategy for lettuce	0 7341 0457 X	2002
VG98050	Development of a sustainable integrated permanent bed system for vegetable crop production including sub-surface irrigation extension	0 7341 0398 0	2002
VG98051	Development of a national technology transfer strategy for the carrot industry	0 7341 0080 9	2000
VG98068	Maintaining quality in hydroponic lettuces during marketing through ethylene atmosphere control	0 7341 0533 9	2002
VG98071	Determination of seed quality for the vegetable industry	0 7341 0487 1	2002
VG98076	Screening potato and vegetable soil borne diseases that may be controlled by Eucalyptus leaf mulch - pilot study	1 86423 977 8	2000
VG98079	Fresh and processed vegetable imports to Australia - Health risks and economic opportunities	0 7341 0240 2	2001
VG98082	Lettuce - Best management production practice to meet market requirements of consistent product quality and shelf life	0 7341 0362 X	2001
VG98083	A study of postharvest bacterial rots and browning in lettuce and the development of control methods	0 7341 0455 3	2002
VG98085	Genetic engineering of Brassicas for pest and disease control and improved storage	0 7341 0456 1	2001
VG98093	Identification and quantification of hazards and risks to human health in the vegetable industry	0 7341 0512 6	2002
VG98102	Taxonomic support for diagnostics of plant parasitic nematodes in the vegetable industry and development of a CD ROM library of nematode pests	0 7341 0741 2	2003
VG98105	Improving the long term sustainability of intensive horticultural cropping systems - a feasibility study	0 7341 0090 6	2000
VG98106	Improving the quality and safety of unprocessed and fresh-cut vegetables by modifying agents and biopreservation	0 7341 0444 8	2002
VG98106	Improving the quality and safety of unprocessed and fresh-cut vegetables by modifying agents and biopreservation		2002
VG98107	Weed management in brassicas - improving postharvest quality	0 7341 0632 7	2003
VG98121	Facilitating a Vegetable Industry Development Service for Northern Australia	0 7341 0743 9	2003
VG98141	Preparation of a discussion paper on future directions of quality management for the Vegetable Industry	1 86423 942 5	1999
VG98142	Visit to China by AUSVEG and attendance at the HOFEX '99 and Asiafruit Congress, Hong Kong, May 1999	0 7341 0117 1	1999

VG99005	Quality wash water for carrots and other vegetables: Insurance for clean food and minimising environmental impact	0 7341 0587 8	2003
VG99008	A rapid diagnostic test for clubroot	0 7341 0530 4	2002
VG99013	Sustainable production of quality capsicums	0 7341 0508 8	2002
VG99021	Preparation and production of the the Workboot Series vegetable book and CD-Rom	0 7341 0716 1	2003
VG99030	Developing strategies to stimulate local consumption, export and import replacement of globe artichokes	0 7341 0436 7	2002
VG99033	Environmental research on the impact of bumblebees in Australia and facilitation of national communication for and against further introductions	0 7341 0532 0	2002
VG99034	Understanding the causes of sudden wilt of capsicum	0 7341 0645 9	2003
VG99057	A survey approach to investigate the soil factors associated with the productivity and sustainability of vegetable production in Australia	0 7341 0689 0	2003
VG99060	Australian Vegetable Industry Development Plan - Implementation and identification of regional issues in Western Australia and South Australia	0 7341 0248 8	2000
VG99061	Improved control of fungal storage rots of Japanese squash	0 7341 0196 1	2000
VG99073	Attendance at Asia Food 2000, Singapore, April 2000 and to research access and servicing issues related to exporting Australian vegetables	0 7341 0293 3	2001
VG99075	Protected cropping technology investigation tour to Israel, May 2000	0 7341 0188 0	2000
VG99076	Identification of techniques to produce poultry manure and compost teas and their benefits for vegetable production	0 7341 0163 5	2001
VX00012	Enhanced metalaxyl breakdown and its implication in Australian horticulture	0 7341 0370 0	2002
VX00013	Biofumigation - optimising biotoxic Brassica rotations for soil-borne pest and disease management	0 7341 0772 2	2003
VX00032	Study tour to USA and Europe to investigate innovation and trends with potato, carrot and onion production, July 2001	0 7341 0371 9	2001
VX01026	Building strategic alliances with young Australian and New Zealand vegetable and potato industry representatives	0 7341 0711 0	2003
VX99002	Increasing the opportunities for use of organic wastes in the Tasmanian vegetable industry	0 7341 0445 6	2002
VX99004	Clean and safe handling systems for fresh vegetables and tomatoes	0 7341 0648 3	2003
VX99011	Improved herbicide management for increased yield and quality	0 7341 0597 5	2002
VX99021	Detection and management of copper-tolerance in bacterial diseases of vegetables	0 7341 0630 0	2003
VX99040	Workshop to review cadmium R&D in potatoes and vegetables, August 1999	1 86423 962 X	1999
VX99043	Enhancing root and soil health in tomato and melon cropping systems	0 7341 0407 3	2002
